

Winterizing Service

Our services include:

1. to the extent possible:
 - A. removing water from all water lines, both hot and cold by applying air pressure to the plumbing system
 - B. draining the hot water heater
 - C. emptying toilet tanks and built-in traps
 - D. draining any outside hose bibs and removing any connected hoses

We try to remove water from the water lines to ice makers/water dispensers and to dishwasher.

2. Adding RV antifreeze
 - A. to all traps
 - B. toilet tanks
 - C. dishwasher(s)
3. Setting thermostats to the owners prescribed setting
4. Turning off all unused 240v Circuit breakers, typically the:
 - A. water heater
 - B. range
 - C. dryer
 - D. on occasion some or all the electrical heating circuits
 - E. on occasion the AC/heat pump unit.
